- Gujarati (Fluent)
- Hindi (Fluent)

PROFILE

A highly motivated and detail-oriented individual with a strong foundation in backend and full-stack development. Passionate about designing efficient solutions and optimizing performance, I enjoy tackling complex challenges with a logical and analytical approach. Proficient in Java, SQL, and web technologies, I thrive in collaborative environments and adapt quickly to evolving technologies.

PROJECTS

Society Management System | Github Link — 2023 - PRESENT
Team Project

A web-based platform designed to streamline society operations, providing features for announcements, complaint management, visitor tracking, and maintenance requests. The system enables secure authentication, allowing residents and administrators to manage society-related tasks efficiently.

Tech Stack: HTML, CSS, JavaScript, Node.js, Express.js, MongoDB

Personal Portfolio | Live Demo — 2025

A personal portfolio website crafted to present academic projects, technical skills, and professional interests in a clear and organized manner. Designed with a focus on responsiveness and user experience, it offers intuitive navigation and clean visual design.

Tech Stack: React, Tailwind CSS

Currency Converter | Live Demo — 2024

A simple web application that allows users to convert currencies in real time using the ExchangeRate API. The application provides an intuitive interface for selecting currencies and displays accurate conversion rates instantly.

Tech Stack: HTML, CSS, JavaScript, ExchangeRate API

CERTIFICATION

J.P.Morgan Software Engineering Job Simulation — Sept 2024
Forage

EDUCATION

Bachelor of Engineering — 2022 - Present
Computer Engineering | Government Engineering College
CGPA: 8.57 / 10

HSC — 2022
Percentage: 71.07

SSC — 2020
Percentage: 80.33
